

# Need a medical solution?

## Submit medical problems to the UCLA INVENTATHON

In an effort to kick off the entrepreneurial spirit this year at UCLA, Innovation Week will host an INVENTATHON to create new medical solutions for physicians, nurses, clinical staff, administrators, and students!

What is an INVENTATHON? Similar to popular hackathons, UCLA student teams will develop devices and software during an intense 24 hour race to address medical problems.

Please submit your medical need to [bsc@mednet.ucla.edu](mailto:bsc@mednet.ucla.edu) by **August 30<sup>th</sup>** for the design challenge and let a team of motivated students develop a solution for you!
